○○○ # Dashboard: Dashboard

1. - Filter: Today, yesterday, last 7 days, 30 days, custom range, this week, last week, this month, last month, this year and last year
   - Filter by User / Computer
   - Refresh and print page button
2. Time of productive, unproductive, undefined and total time
3. Button to download the application agent
4. Filters to Team Pulse: Active now, Productivity, Groups and Users
5. A Box with informations: User / application or URL open / Score
6. Add a Productivity graph with time and filters * Can be another style
7. Bar with top users and groups to show scores* Can be another style
8. Add a Graph with Top application and list* Can be another style
9. Top site graph + list * Can be another style
10. We need a Widget to: Peinding Classification

Design:
https://www.figma.com/file/amToVm8TWAtZpue53QLfB4/Metronic?node-id=328%3A6127

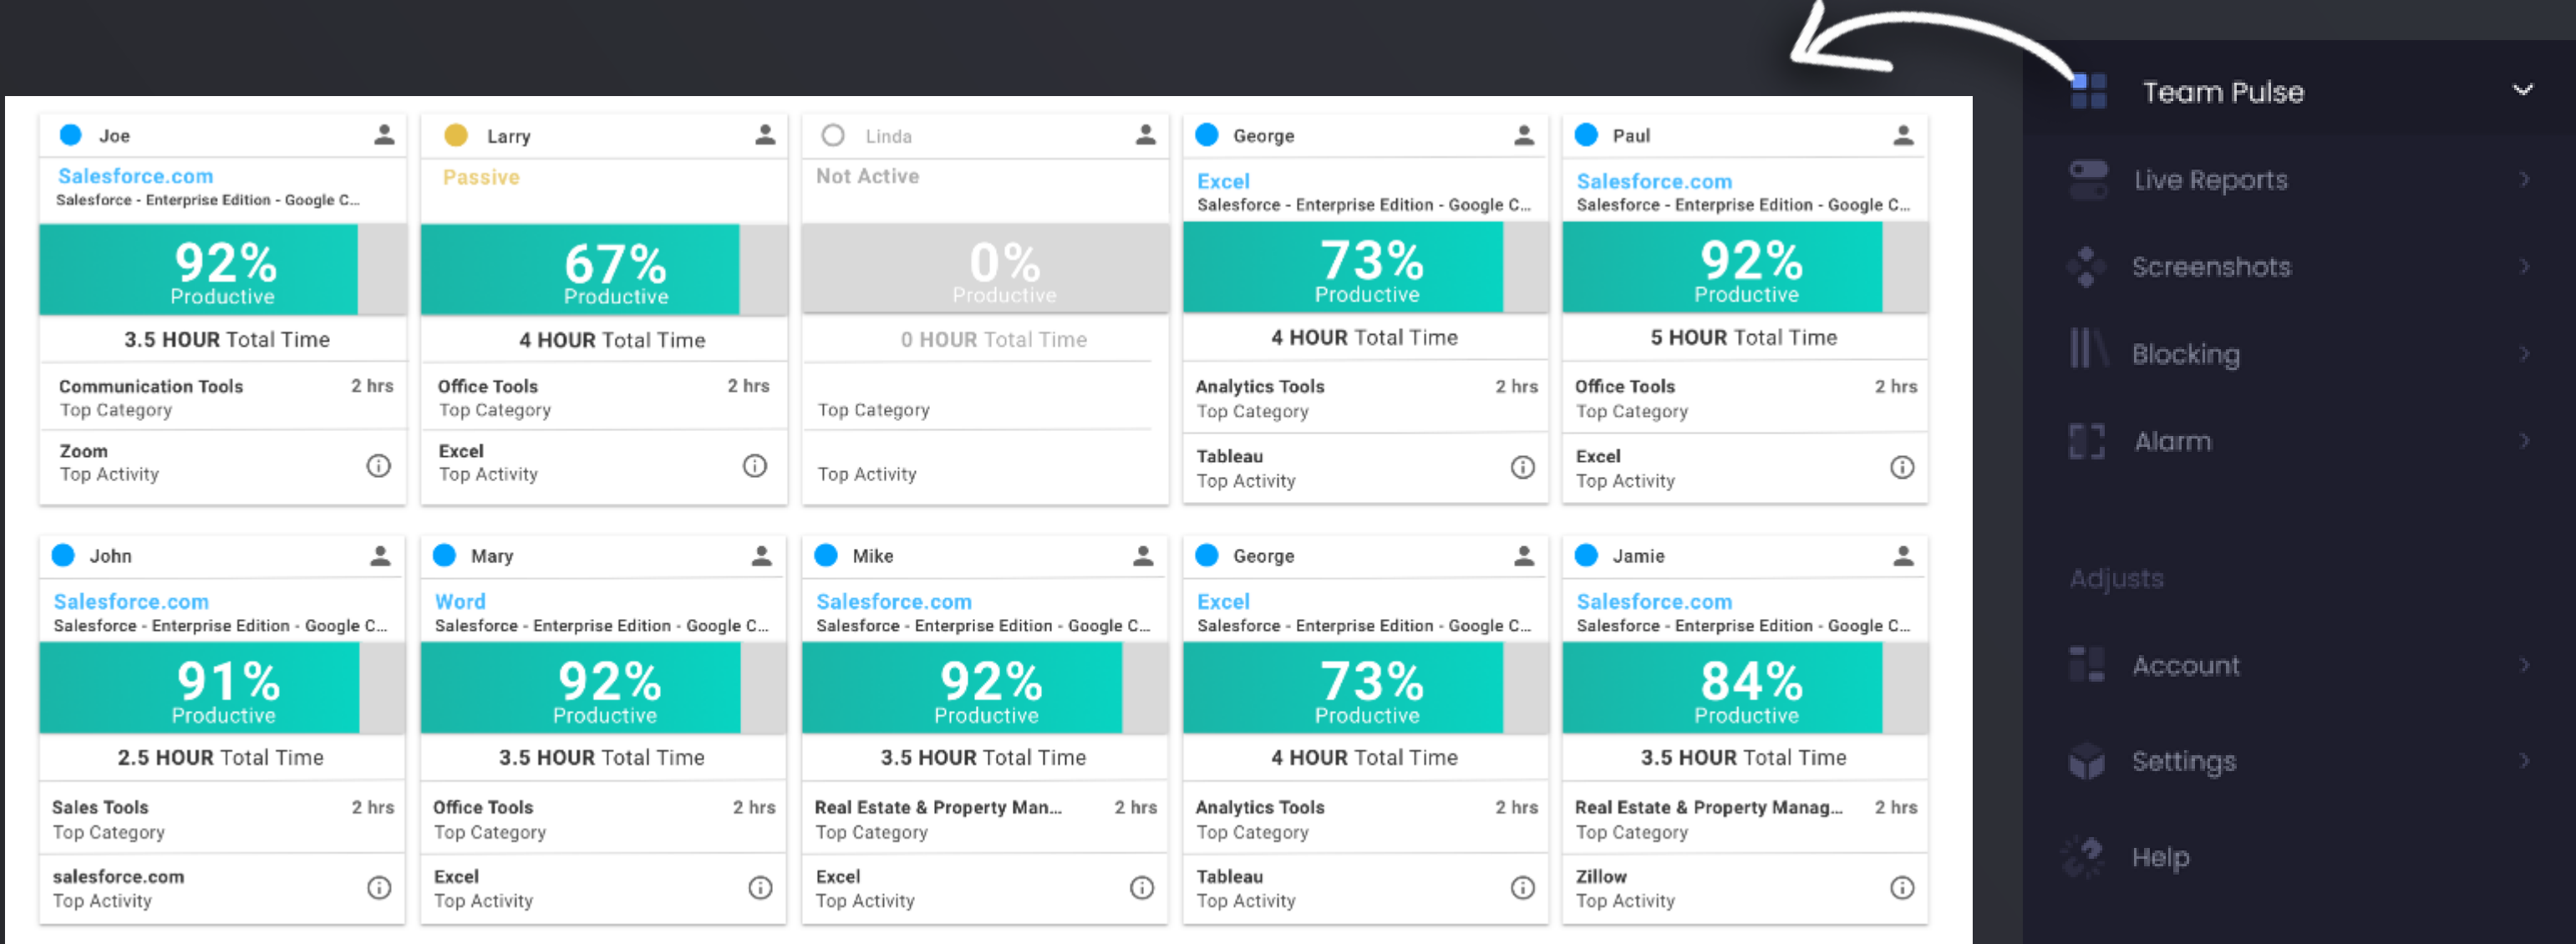

Dashboard: Team Pulse

- Add widget with the features:

Get a Daily Team Pulse on Productivity

See a snapshot of workforce productivity for the day with Team Pulse. View cards for each employee and across teams summarizing key information such as:
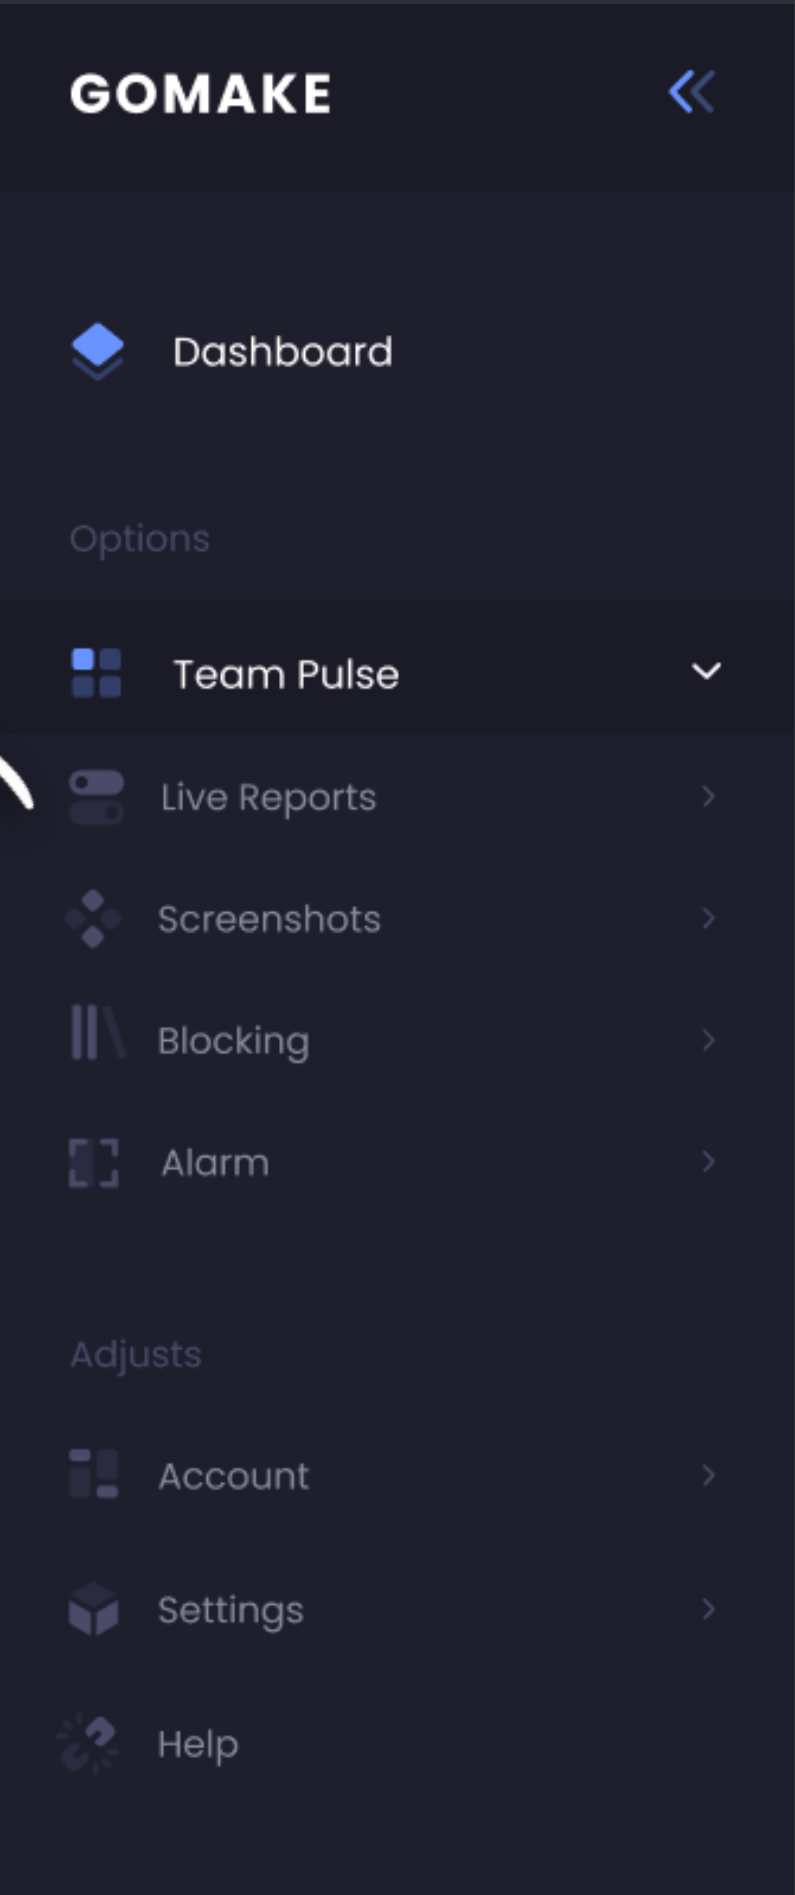

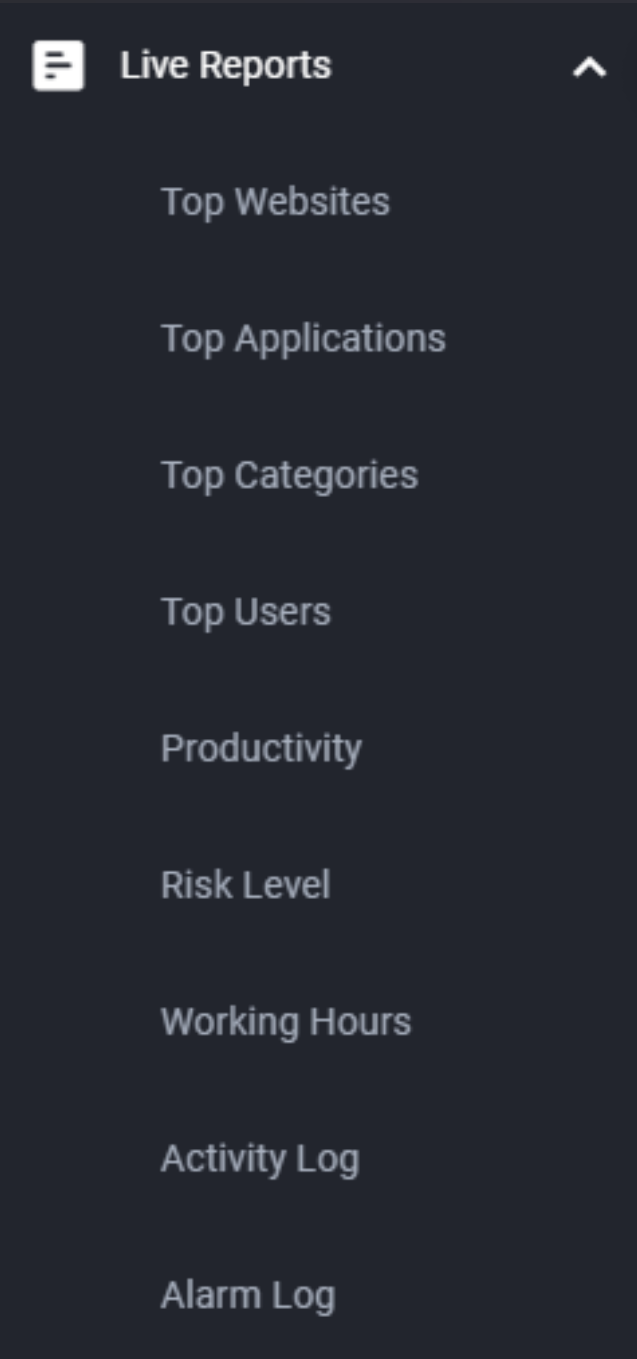

- Daily at-a-glance snapshots of individual and team productivity.
- Employees' real-time availability (active, passive, offline) with easy color-coded identifiers.
- Productivity status by % indicators revealing top performers.
- Number of hours worked by each employee.
- Drill-down into reports for additional details on application usage and productivity analysis.
- Filter by users or groups to see snapshots of the workday for individuals and teams.
- View Productivity by Individuals
- View Productivity by Teams

https://support.activtrak.com/hc/en-us/articles/360045182031-What-is-Team-Pulse-and-How-to-Use-it-

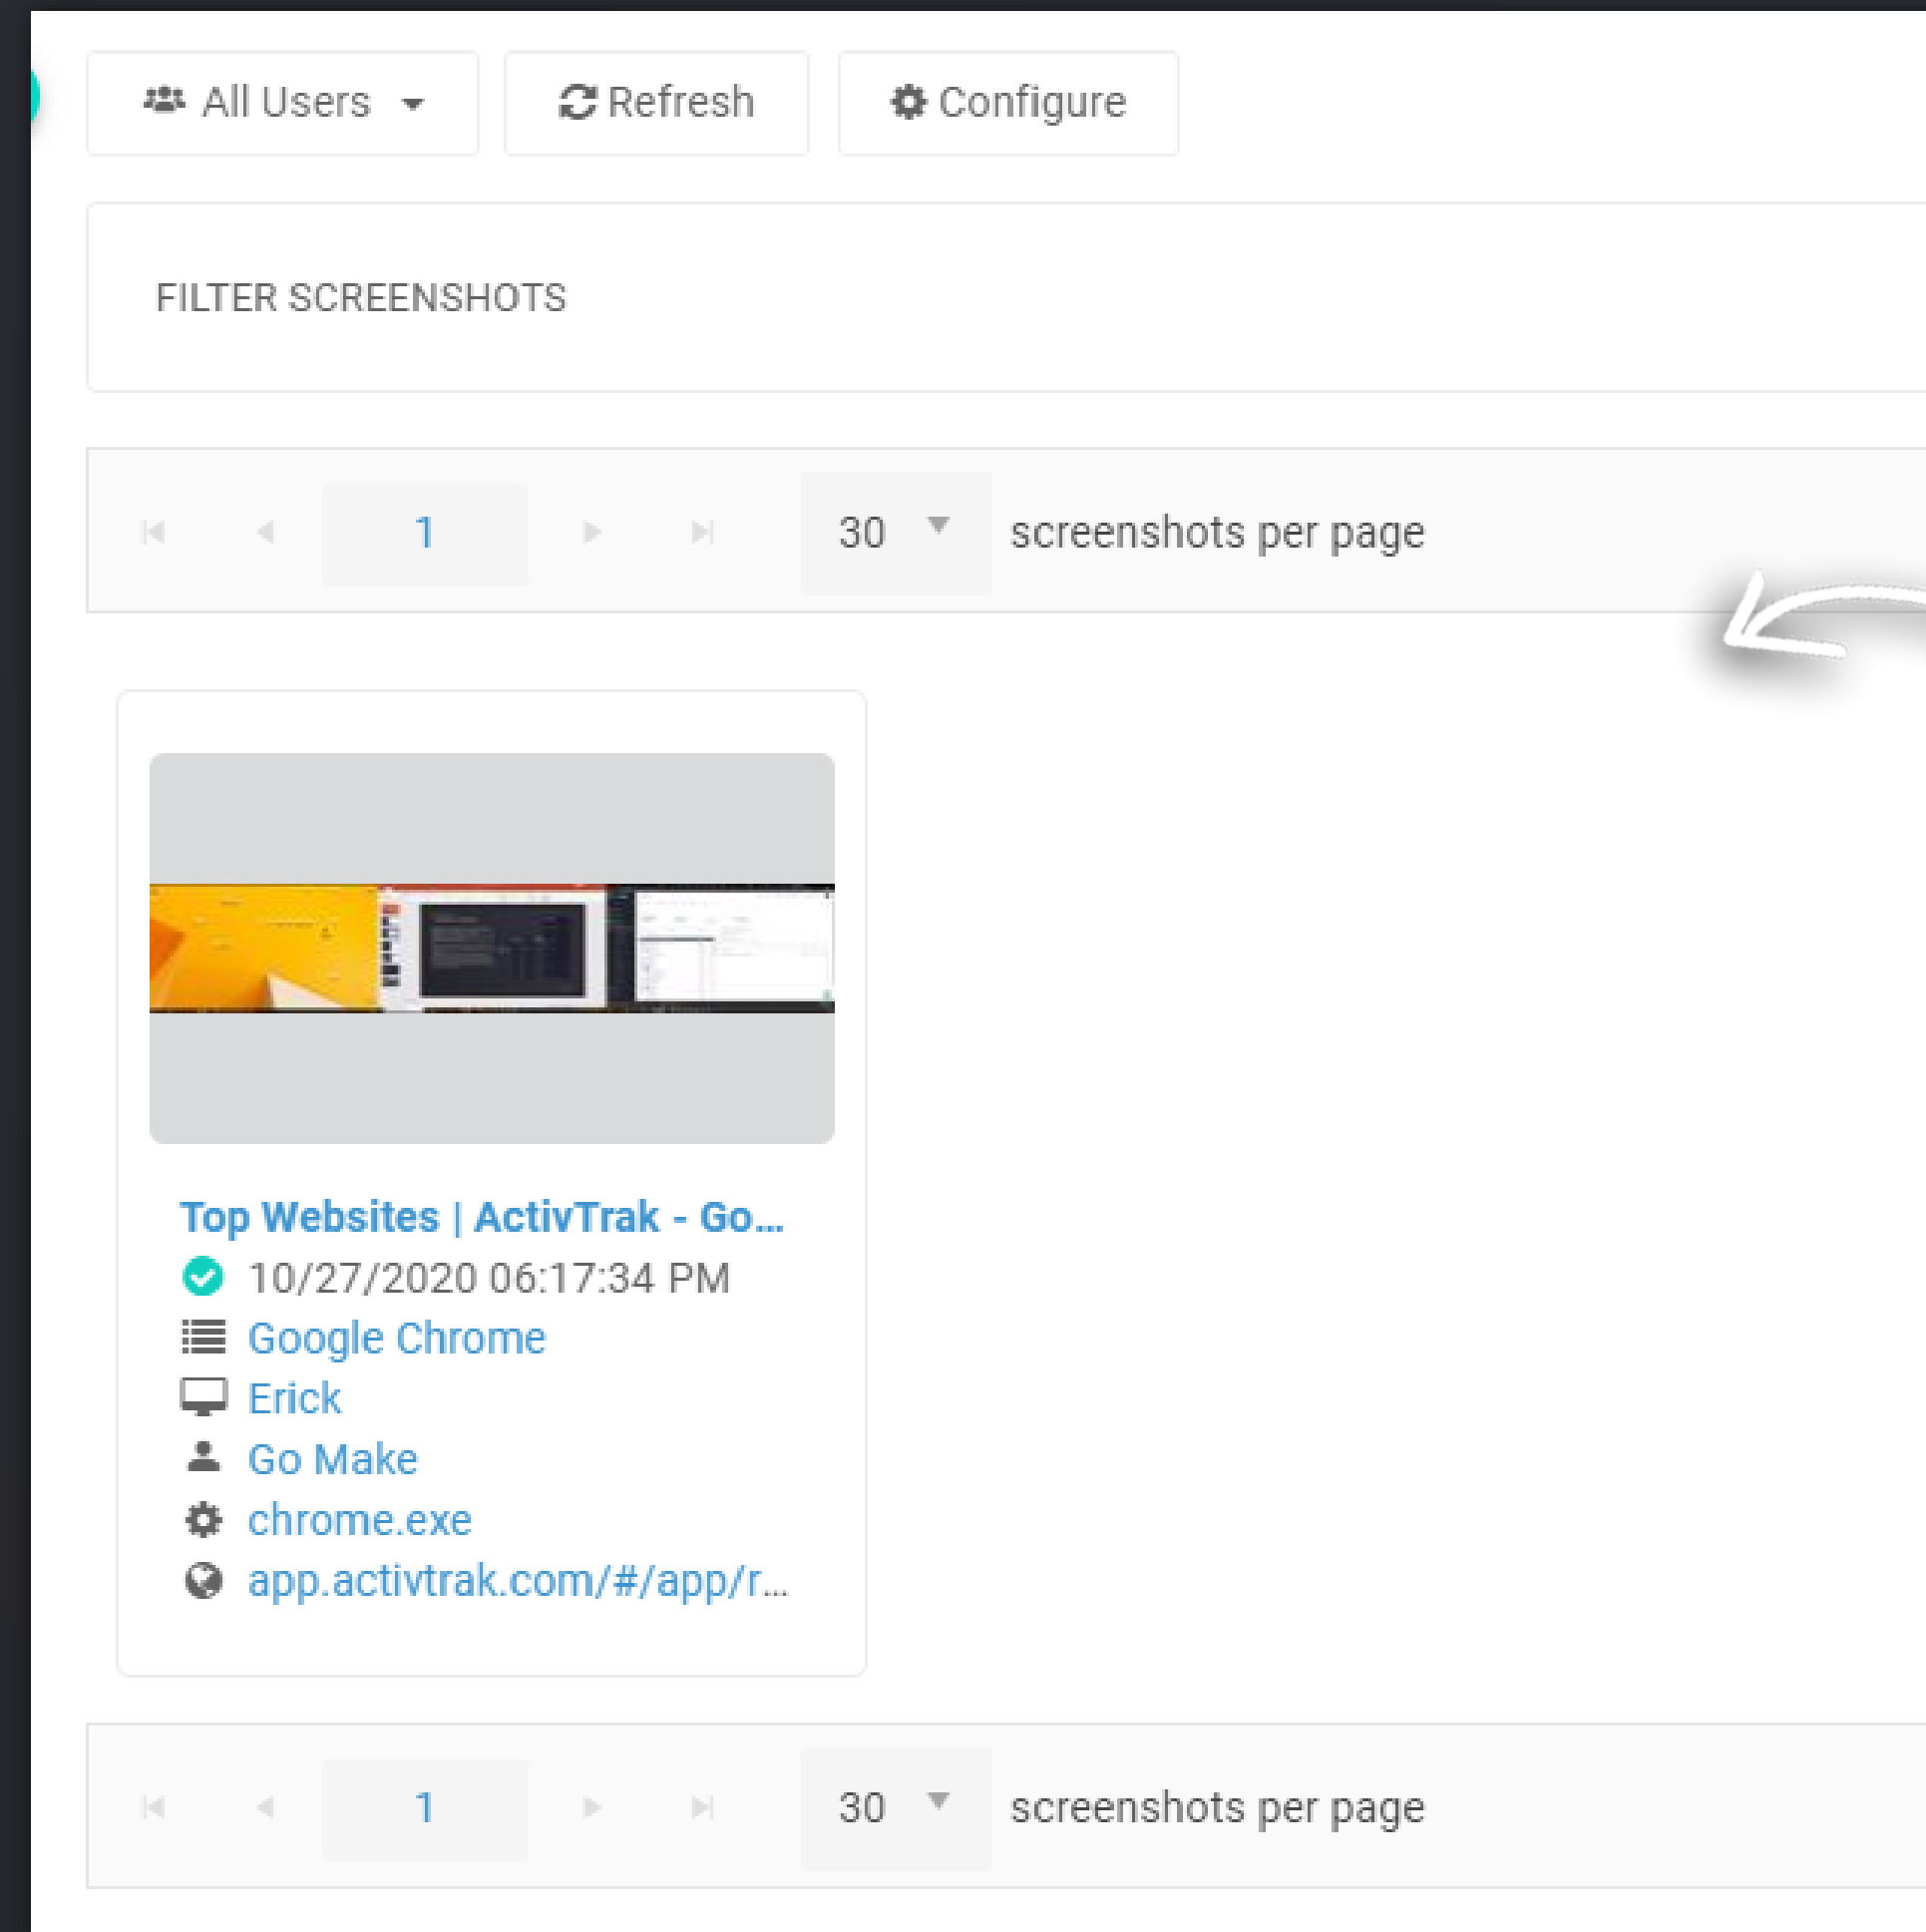

gomake.com.br

Dashboard: Live Reports

- **Top Websites:** Show list with Websites / duration / % / Classification / QUICK STATS
- **Top Application:** Show list with Websites / duration / % / Classification / QUICK STATS
- **Category:** Show list with classification / duration / % / QUICK STATS
- **Top Users:** Filters / list with User: Productiviry Ratio, Active Time, Passive Time, Total time
- **Productivity:** Graph with classification and time
- **Risk Level:** Show grid with user, Alarm count, risk point and risk score / Type, Alarm per user
- **Working Hours:** Add grid with Date, Groups, Computer, User, First Activity, Last Activity, Last Activity Log, Total Time, Active Time, Productive, Unproductive, Undefined, Passive time and filters
- **Activity log:** Add grid with filters, field to search and list with Classification / Screenshot notification / Computer / User / Duration / Title / executable / description / Url
- **Alarm Log:** The Alarm Log will look very similar to the Activity Log. It will display data like whether or not the action was considered Productive or Unproductive, the name of the Alarm, when it was triggered, which machine was used and by which user, along with the duration of the activity, and other fields.

❓ Help

GoMake - Agência Digital 2020

Dashboard: Screen view

1. This new feature is layered on top of our existing Real-Time page - all real-time features are still available. To view Real-Time you can click through to the extended view or Screen View tabs within the Team Pulse page. (You can also switch back to the classic dashboard if that's your business.)

Example: https://support.activtrak.com/hc/en-us/articles/360045393931--Team-Pulse-Release-4-0-

gomake.com.br

Dashboard: Blocking

- Add 2 grid: Group / Blocked domains
- Add Button to cancel / Apply changes
- Create a list of blocked domains
- add, remove, and modify the list of blocked domains as needed.
- Create groups of any number of employees to block specific websites from including individuals, departments, or the entire organization.

- DOC: https://activtrak.com/product/website-blocking/

GoMake - Agência Digital 2020

Dashboard: Alarm

- Screen to manager the alarm
- Add button to create new alarm
- Grid with: Status, type, name, conditions, group, risk, screen caption, email notification, display notification, terminate application, external.

Option to Customize each notification

- Example: https://app.activtrak.com/#/app/alarms/

ALARM RISK LEVEL

ⓘ The alarm risk level is used to determine the level of risk of a triggered alarm.
